

COVID-19 WEBSITE

(Namastey Bharat)

Tejendra Saini-19244(ECE)

ABOUT

This project involves a website related to covid-19 pandemic. It provides every information regarding covid and it has a great feature which suggests things you could do during quarantine to spent your time in different fun and productive activities. As this pandemic is creating a huge stress scenario, this website can be helpful in providing them a positive approach of the life.

PROCEDURE

This Project was started with normal format of website making as with HTML, CSS and Javascript then

- We are developing it with all the major links it should be held with like of major Govt. websites and NGOs and other firms working as volunteers to all the needy ones.
- After all the front end work we will attach them with some APIs(Application Programming Interfaces) that will be helpful in the medical facilities to the needy ones.

- DEVELOPMENT TOOLS

- HTML
- CSS
- BOOTSTRAP
- JAVASCRIPT
- JQUERY
- VS CODE

DESKTOP VIEW

The screenshot shows a desktop browser displaying the COVID-19.org website. At the top, there is a navigation bar with links for "Corona Updates", "Help", "About", and "Contact". The main content area features a large, bold headline "Stay Home. Stay Safe." in black and orange text. Below the headline, a subtext reads "Let's all work together to put an end to this pandemic. Help stop the spread and Save Lives." A blue "Learn More" button is positioned below the subtext. To the right of the text is a colorful illustration of a person sitting on a yellow couch, working on a laptop. The background includes a lamp, a clock, and some plants. The overall design is clean and modern.

The screenshot shows a continuation of the COVID-19.org website's desktop view. At the top, there is a navigation bar with links for "Corona Updates", "Help", "About", and "Contact". Below the navigation, a section titled "Why is it important that You Stay Home?" is displayed. To the left of the title is an illustration of a doctor wearing a mask and holding a clipboard. The section contains four numbered points, each with a corresponding icon and text:

- 01** Covid-19, which is now a fast growing global pandemic. The number of confirmed cases worldwide has exceeded 39,000,000 due to rapid spreading of the virus.
- 02** Covid-19, spreads very easily, much easier than many other regular illnesses we deal with on a regular basis. That's what makes it so dangerous.
- 03** The best course of action is to stay at home prevent the spread of the disease as well as hospitals getting overwhelmed with patients who simply shouldn't be there.
- 04** As of today, there is no known cure and no approved vaccine for Covid-19
